

<http://ec-marie-curie-joue-les-tours.tice.ac-orleans-tours.fr/eva/spip.php?article343>

The poster features a black and white photograph of a young Marie Curie in a laboratory, holding a flask. To her right is a large glass bottle with a stopper, labeled 'Marie Curie' in cursive. The text 'Marie CURIE' is prominently displayed in the center, with 'CURIE' in large, bold, green letters. Below this, there is a quote: 'A truly remarkable woman: Marie Curie is best known for her discovery of the radioactive elements polonium and radium.' The poster also includes a timeline with dates 1867 and 1934, and a quote at the bottom: 'We must have perseverance and above all confidence in ourselves. We must believe that we are gifted for whatever we set our hands to do, that we will accomplish it by whatever means we have.' The text 'Classes - CE2 - CONTINUITÉ PÉDAGOGIQUE -' is written across the bottom of the poster.

# Travail des 30 et 31 mars

Classes - CE2 - CONTINUITÉ PÉDAGOGIQUE -
